

# M Abdullah Rehan

## Web Developer

Hello! My name is Muhammad Abdullah Rehan, and I am a MERN Stack Developer. Currently in my final year of Computer Science at Comsats University of Lahore, I have been actively engaged in the field of development since 2019. As I approach the next phase of my professional journey, I am eagerly seeking opportunities to kick-start my career with a dynamic company. With a strong foundation in MERN Stack development and a passion for innovative solutions, I am ready to contribute my skills and dedication to a team-driven environment.

## Education

### BS Computer Science

COMSATS University Lahore

## Expertise

- ReactJs
- React Native
- Mern Stack
- Tailwind
- Figma
- Photoshop

## Language

English

Urdu

## Experience

### ReactJS

I have honed my skills in React JS, a popular JavaScript library for building user interfaces. I possess a solid understanding of React components, state management, and virtual DOM, allowing me to create dynamic and efficient web applications. I have hands-on experience integrating React applications with backend services, utilizing Axios or Fetch for data retrieval, manipulation, and rendering. I am also skilled in creating responsive and mobile-friendly applications, ensuring optimal user experience across different devices and browsers. Some of my projects are :

[Scientific Calculator](#)

### Mern Stack

I have extensive skills in the MERN stack, which enables me to develop full-stack web applications. I excel in front-end development using React.js, while leveraging Node.js for efficient back-end functionality. With expertise in database management using MongoDB and API development using Express.js, I am adept at creating scalable applications. Continuously staying updated with emerging trends and best practices, I am committed to delivering high-quality solutions with a strong focus on performance and usability. Some of my mern projects are :

### React Native

I have acquired a strong command over React Native, a popular framework for building cross-platform mobile applications. With in-depth knowledge of React Native components, navigation, and state management, I am proficient in developing high-performance and visually appealing mobile apps. I have a keen eye for UI/UX design principles and apply them effectively in React Native projects. By using React Native's flexible styling and layout features, I create intuitive and visually appealing interfaces that enhance user engagement and satisfaction. Some of my react native projects are :
